DETAILED ACTION

1. This Office action is responsive to amendment filed on 1/31/2003.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Troxell (U.S. Patent No. 5,177,406).

Regarding claims 1, 20, 25, and 27, referring to Figs. 1-5, Troxell teaches an electroluminescence display device, comprising: a first pixel cell (16a) displaying a first color; a second pixel cell (16b) displaying a second color; a first driving circuit (34a) receiving a first driving voltage and applying a first driving current to the first pixel cell based on the first driving voltage; and a second driving circuit (34b) receiving a second driving voltage and applying a second driving current to the second pixel cell based on the second driving voltage, wherein: the first and second driving voltages are equal, and the first and second driving currents are different, whereby the first and second pixel cells are independently driven (see abstract, from col. 5, line 29 to col. 8, line 16 and from col. 10, line 24 to col. 12, line 45).

Regarding claims 10, 17-19, 21-24, and 28, Troxell further teaches a third pixel cell (16c) displaying a third color, and a third driving circuit (34c) receiving a third driving voltage and applying a third driving current to the third pixel cell based on the third driving voltage, wherein the first, second and third driving voltages are equal, and the first, second and third driving

Application/Control Number: 09/667,003

Art Unit: 2674

÷, .,

currents are different, whereby the first, second and third pixel cells are independently driven

(from col. 5, line 29 to col. 8, line 16 and from col. 10, line 24 to col. 12, line 45).

Regarding claims 16, 2-9, 11-15, and 26, Troxell teaches an electro-luminescence display

device, comprising: a first driving circuit (34a) including a first transistor having a first channel

width and a first channel length, the first channel width to the first channel length forming a first

ratio; and a second driving circuit (34b) including a second transistor having a second channel

width and a second channel length, the second channel width to the second channel length

forming a second ratio, the first ratio being different from the second ratio (from col. 5, line 29 to

col. 8, line 16 and from col. 10, line 24 to col. 12, line 45).

Applicant's arguments with respect to claims 1-28 have been considered but are moot in 4.

view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Jennifer T. Nguyen whose telephone number is 703-305-3225.

The examiner can normally be reached on Mon-Fri from 9:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Richard A Hjerpe can be reach at 703-305-4709.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, DC. 20231

Or faxed to: 703-872-9306 (for Technology Center 2600 only)
